

Town of Allenstown
16 School Street
Allenstown, NH 03275

Infrastructure Maintenance Schedule

Street Sweeping:

Sweeping is performed every spring on all town roads and sidewalks inside the MS4 areas and as many outside of the MS4 areas as the budget will allow. The sweeping of the roads are contracted out to a private company and the sidewalks are swept in-house by the Highway Department. Sweeping of all State roads in town are completed by the State of NH DOT usually in late summer.

Catch Basin Cleaning:

All catch basins in and out of the MS4 areas are cleaned every spring as soon as the roads have been swept, the trouble drain catch basins that are over 50% full of debris are inspected and cleaned again in the fall if needed. During the cleaning process, the sump is measured and catch basin are inspected for structural issues. This catch basin cleaning is contracted out to a private company but the measuring and inspection of the drain catch basins is performed in-house by the Highway Department. All State of NH drain catch basins are clean and monitored by the State of NH DOT.
